Divan Ballubhai Secondary School (DBSS) - 10 th ; Percentage : 70.5	Gujarat, India

Work Experience

Web Development Inter Prodigy InfoTech Link	Sep 2024
- Developed a responsive landing page with interactive elements, including a color-changing menu and a functional cart system. - Created a fully functional stopwatch with start, pause, lap recording, and reset features using HTML, CSS, and JavaScript. - Built a Tic-Tac-Toe game with human and AI opponents, enhancing game logic and AI implementation skills. - Designed and developed a personal portfolio website showcasing skills, projects, and experience in front-end development. - Developed a dynamic weather web app using the OpenWeather API, integrating real-time weather updates and location-based services.	
Data Analytics Virtual Intern Accenture North America Link	Aug 2024
- Processed and analysed 7 datasets, performing data cleaning, transformation, and modeling. - Extracted actionable insights to support data-driven decision-making. - Developed a PowerPoint presentation and video report to effectively communicate findings. - Strengthened skills in data analytics, visualization, and storytelling for business insights.	

Projects

Personal Profile Portfolio Web Site	Mar-Jun 2025
- Developed a dynamic personal portfolio website to showcase skills, education, projects, and internships. - Designed an interactive and user-friendly interface for seamless navigation. - Implemented real-time updates to ensure content remains up-to-date. - Enhanced professional online presence with a structured and visually appealing layout.	
WebGen AI Code Generator Website	Jun 2025
- Built a responsive web app that generates code from natural language using Hugging Face Transformers. - Integrated voice input, real-time code preview, and automatic language detection. - Focused on improving accuracy and addressing limitations like slow generation and incomplete HTML/CSS output.	
Book Town Android App	2022 – 2023
- Developed Book Town, an online platform for buying and selling new and used books. - Implemented live tracking and name-based searching for an enhanced user experience. - Designed a multi-role system with Admin, Buyer, Seller, and Common (Buyer + Seller) functionalities. - Ensured seamless transactions and user management, improving book accessibility for users.
